Aiwerioghene Adesuwa

Front-End Developer

✉ adesuwaaiwerioghene12@gmail.com 📞 +234 905 351 7220 📍 Lagos, Nigeria 🔗 adesuwa.xyz

EDUCATION

B.Sc. in Computer Science   07/2025
Babcock University   Ilishan-Remo, Ogun
                                                                          State, Nigeria

PROFESSIONAL EXPERIENCE

Front-End Developer   02/2025 – Present
Kwurah   Remote, USA
- Developed and maintained the company website using Next.js and Tailwind CSS as the primary tech stack
- Collaborated closely with the backend team to integrate APIs and connect data-driven components to the UI
- Ensured performance optimization and responsiveness across all projects and deployments

Front-End Developer Intern (Hybrid, Full-Time)   01/2024 – 06/2024
HabariPay Ltd.   Victoria Island, Lagos
- Built modular and reusable components using React.js and Tailwind CSS
- Supported marketing and design teams by translating Figma designs into SPAs
- Reported directly to the CTO and participated in planning sprints and feature releases

PROJECTS

BUCC Crunch
React, Tailwind, RESTful API
An interactive web-based magazine platform for the Computer Science department at Babcock University.
- Designed and built a responsive front-end for posting departmental news and events
- Integrated real-time updates using RESTful API and Postman

Codestash 🔗
MERN Stack
A full-stack code snippet manager for developers to securely store, edit, and manage reusable code snippets.
- Integrated a Node/Express backend and MongoDB database
- Deployed with Vercel (frontend) and Render (backend)

Bulk Payment Dashboard & Landing Page 🔗
React, Tailwind CSS
Developed a responsive landing page and dashboard interface to manage and initiate bulk transactions
- Built modular components for forms, transaction logs, and tracking
- Integrated mock APIs and implemented dynamic state management

uSign
Next.js + Typescript, Tailwind CSS, Framer Motion, Axios, FastAPI(Backend)
Built a multi-step web application that allows users to upload PDF documents , signature, and download the signed file.
- Developed a multi-step form flow (Upload → Sign → Download) to streamline the user experience.
- Integrated PDF upload functionality, enabling users to preview and prepare documents for signing.
