Adesuwa Aiwerioghene

Full stack software engineer

Lagos, Nigeria · daysuwa.dev · GitHub · LinkedIn · adesuwaaiwerioghene12@gmail.com

Summary

Full stack engineer with about 2.5 years of professional experience building web apps in React, Next.js, TypeScript and Node, with some Python and .NET. I build software for finance and risk teams, and I currently lead a small engineering team at Kachex. I ship end to end, from the interface to the API, database and the emails that go out when something happens.

Experience

Acting Engineering Lead, Kachex Model Technologies · Oct 2026 to present (Frontend Developer from Jul 2026)

- Lead a small engineering team and report to the CEO, coordinating work across the company's web products
- Built the corporate website (kachexmodel.com), replacing the previous Framer site
- Contribute to the Kachex Core V2 engineering project
- Run technical assessments for backend engineering candidates

Technology Assurance Consultant and Full Stack Developer, Deloitte Nigeria · Feb 2026 to Oct 2026

- Built an IFRS expense allocation and classification platform for insurance clients
- Built a continuous audit monitoring app for a client demo. It shows an auditor what to look at once an anomaly fires and produces a month-end audit report listing the controls that should have been in place
- Developed a regression model for product sales analysis, with a dashboard for what-if scenarios
- Worked on a Risk Control Self-Assessment (RCSA) platform, which was in development
- Delivered in-person training on generative AI in the workplace with Microsoft Copilot

Frontend Developer, Kwurah · Feb 2025 to May 2026

- Built the frontend of a donation platform for Nigerians, similar to GoFundMe, using Next.js, React and Tailwind CSS

- Built the company's website
- Built the frontend of a document-signing SaaS platform

Software Developer Intern, GTCO · Sep 2025 to Nov 2025

- Learned C# and .NET alongside the engineers who build the bank's app, and used it to build Momento, a full stack app with a Next.js frontend and a .NET API

Developer, BUCC Development Team · Sep 2024 to May 2025

- Lead developer on BUCC Crunch, a digital magazine platform where the editorial team writes articles and uploads images to tell BUCC members what happened during the session, built with React and Tailwind CSS
- Won Developer of the Year for the 2024/2025 session

Frontend Developer Intern, Squad (HabariPay) · Jan 2024 to Jun 2024

- Built the bulk payments feature for a fintech product team

Projects

Billio: subscription tracker for people in Nigeria paying foreign subscriptions by card. It shows costs in Naira, can find subscriptions from Gmail, and sends email reminders before each charge. React, TypeScript, Supabase, Resend, Google sign-in.

Product sales forecaster: regression model that predicts units sold by product and region, with a dashboard to explore the data and try what-if scenarios. Python, scikit-learn, FastAPI, .NET API, React. Code

Momento: private journal for daily notes with a .NET API behind it. Next.js, .NET minimal API, PostgreSQL. Live · Code

Stock Mate: inventory tracking for small sellers such as hair vendors and boutiques. Next.js, TypeScript, Prisma, PostgreSQL. Live · Code

Skills

- **Frontend:** React, Next.js, Remix, TypeScript, JavaScript, Tailwind CSS, shadcn/ui, Redux, Zustand
- **Backend:** Node.js, Express, .NET (C#), Python, FastAPI; learning NestJS
- **Data:** PostgreSQL, Supabase, Prisma, MySQL, MongoDB
- **Tools and delivery:** Git, GitHub, Vercel, Render, Postman, Resend for transactional email

Education

B.Sc. Computer Science (Second Class Upper), Babcock University · Oct 2021 to Jul 2025

Preparing for the Microsoft Azure AI-901 (AI Fundamentals) certification.
